Interview question guide for dataset II

Thank you for agreeing to participate in this interview. I have 14 questions I'd like to ask and depending on your answers this interview is likely to take 30-40 minutes. Before we begin I'd like to remind you that you can stop the interview at any time and without giving a reason. Likewise, if you'd like to pause the interview at any stage just let me know and we will pause.

1. To begin, can you please tell me a bit about your teaching responsibilities within the faculty?
    a. Prompt: what kind of courses do you teach on?

2. What kind of teaching do you do?
    Prompt: lectures, labs, online teaching, workshops

3. Thinking back over the past 18 months or so, what kinds of teaching support or teaching development have you experienced?

4. To what extent was that teaching support/teaching development helpful?
    Prompt: Could you apply any learnings to your own online teaching tasks?
    Prompt: If not helpful, could you explain why not? What did you need but didn't receive?

5. What kinds of teaching support do you most appreciate? And why? (eg. at the elbow support, seminars, workshop, online resources)

6. Are you aware of any online teaching software?
    a. Prompts: Which ones do you know about? Which ones have you experienced? What do you think of them? Do you use any of these?

7. Have you had any experience with H5P? Tell me about that.

8. To what extent do you want to create H5P material or have you created H5P material?

9. As teachers, we often have limitations on our capacity to design or redesign teaching content. If capacity wasn't an issue, what kinds of software would you want to work more with?/learn more about?

10. What is your goal/vision for learning experiences in this faculty? How does your work contribute to that? What gets in the way?

11. What do you think is the most important thing teachers need to flourish in their work?

12. Do you have any further thoughts/ideas that you would like to share before we end this interview?

13. Can I please check some demographic data with you? Specifically, I am interested in your age bracket (eg. 20s, 30s, 40s, 50s, 60s, 70s), ethnicity, gender, and highest formal qualification.

Thank you for your time.
